

Figure O-1. Additional impacts of human development stressor risk factor values for GDE springs in Nevada. Ratings are from 0.00 (negligible risk) to 1.00 (high risk).

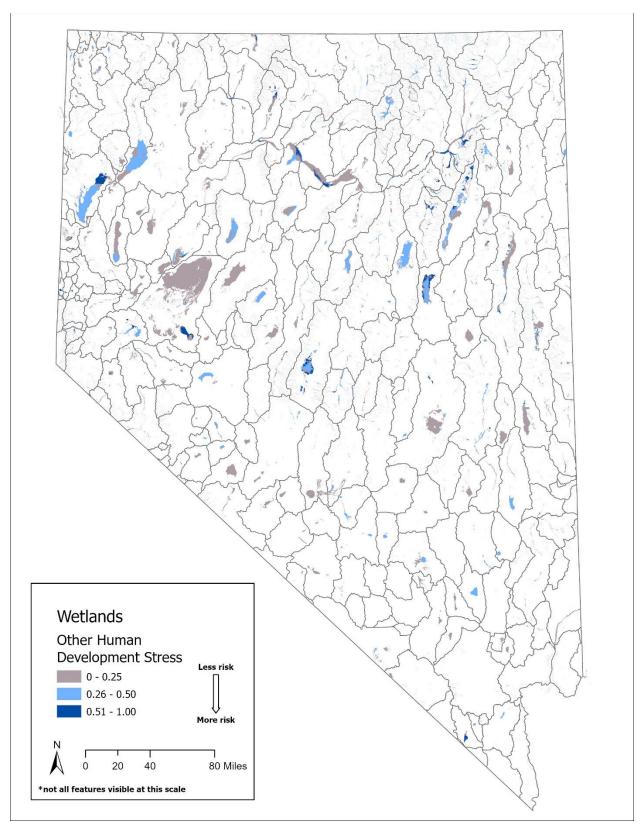

Figure O-2. Additional impacts of human development stressor risk factor values to GDE wetlands in Nevada. Ratings are from 0.00 (negligible risk) to 1.00 (high risk).

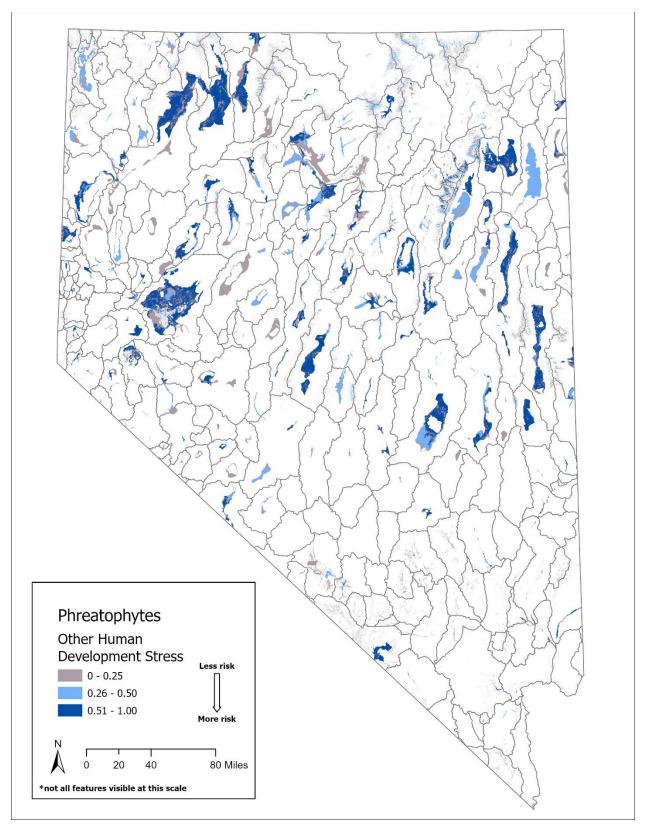

Figure O-3. Additional impacts of human development stressor risk factor values to GDE phreatophyte communities in Nevada. Ratings are from 0.00 (negligible risk) to 1.00 (high risk).

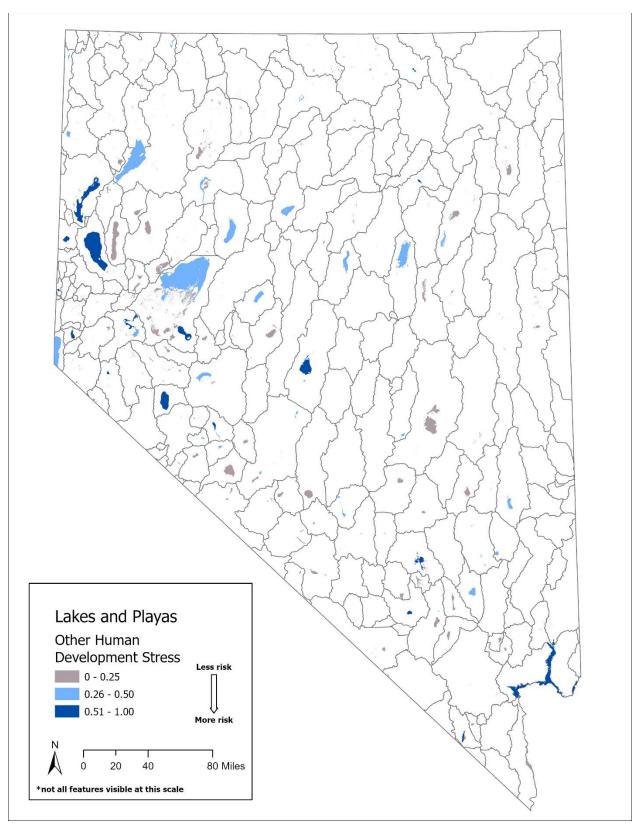

Figure O-4. Additional impacts of human development stressor risk factor values to GDE lakes and playas in Nevada. Ratings are from 0.00 (negligible risk) to 1.00 (high risk).

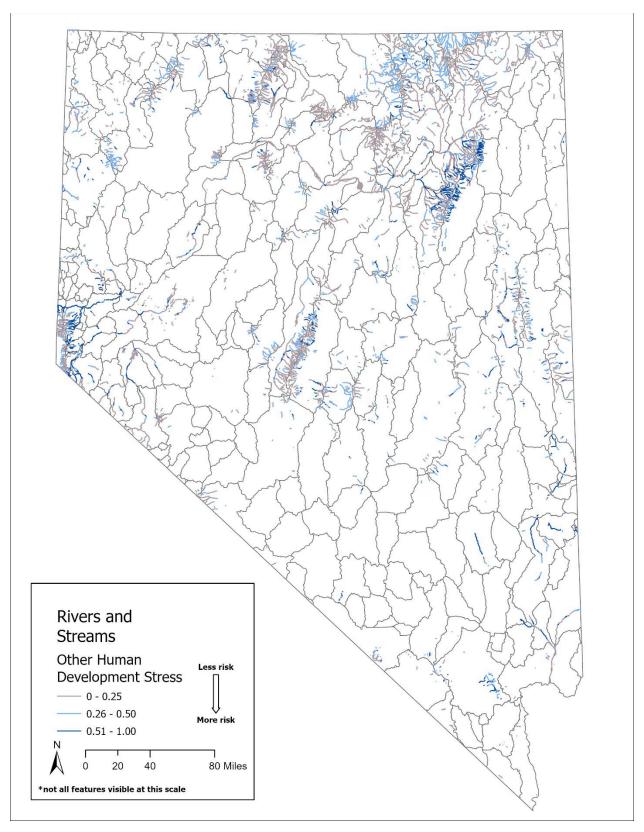

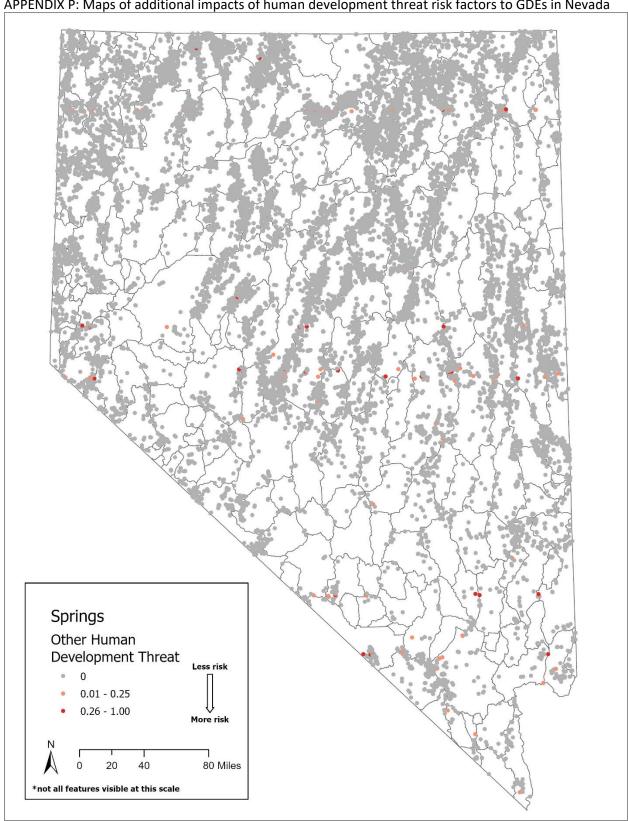

Figure O-5. Additional impacts of human development stressor risk factor values to GDE rivers and streams in Nevada. Ratings are from 0.00 (negligible risk) to 1.00 (high risk).

APPENDIX P: Maps of additional impacts of human development threat risk factors to GDEs in Nevada

Figure P-1. Additional impacts of human development threat risk factor values for GDE springs in Nevada. Ratings are from 0.00 (negligible risk) to 1.00 (high risk).

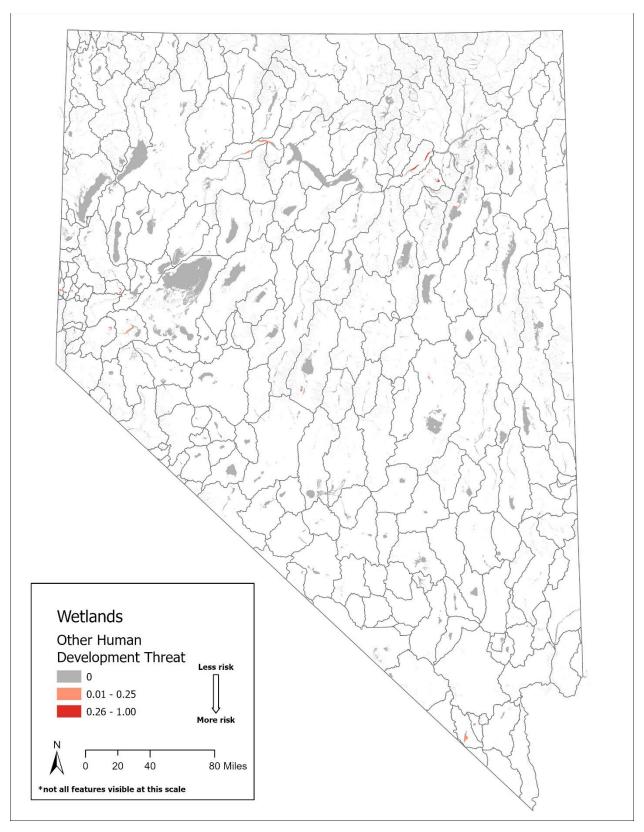

Figure P-2. Additional impacts of human development threat risk factor values to GDE wetlands in Nevada. Ratings are from 0.00 (negligible risk) to 1.00 (high risk).

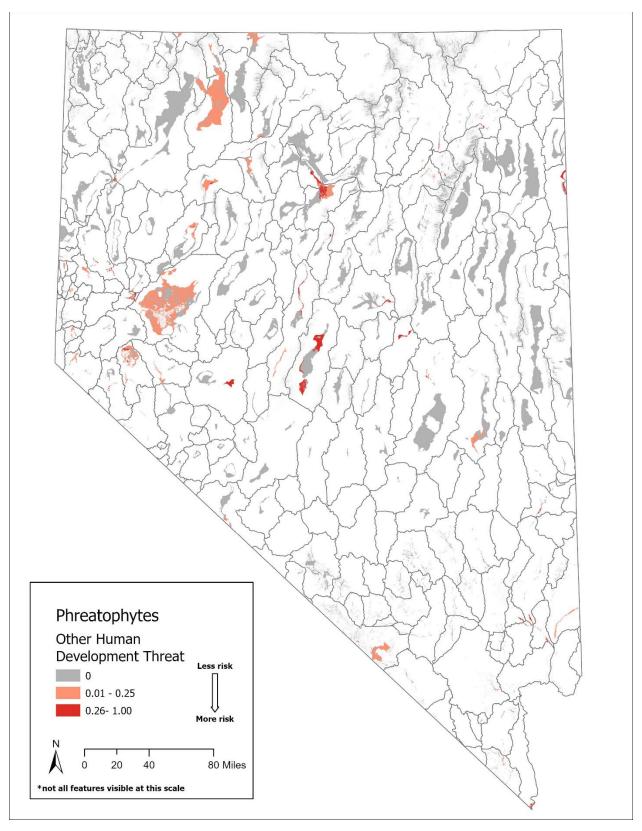

Figure P-3. Additional impacts of human development threat risk factor values to GDE phreatophyte communities in Nevada. Ratings are from 0.00 (negligible risk) to 1.00 (high risk).

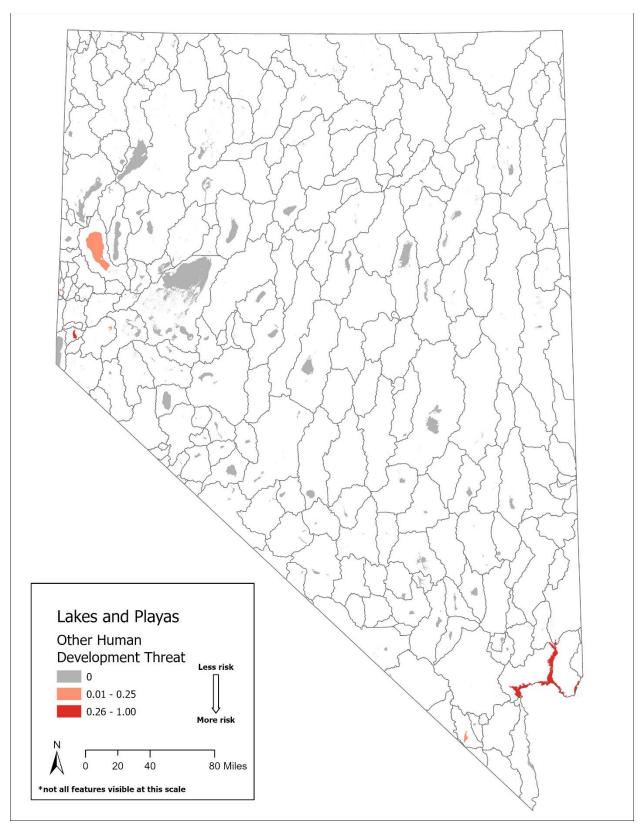

Figure P-4. Additional impacts of human development threat risk factor values to GDE lakes and playas in Nevada. Ratings are from 0.00 (negligible risk) to 1.00 (high risk).

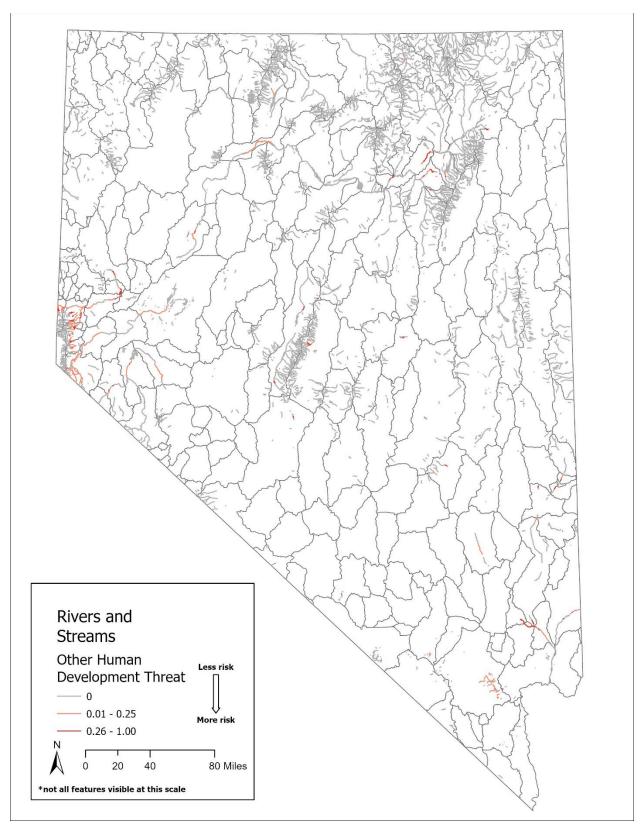

Figure P-5. Additional impacts of human development threat risk factor values to GDE rivers and streams in Nevada. Ratings are from 0.00 (negligible risk) to 1.00 (high risk).
